QA Process Overview

QA Dashboards and Reports

Home Health Care offers a number of dashboards and reports to help agencies manage the QA Process.

Tips:

- Reports and dashboards must be enabled and set up for user roles by your system admin.
- To add a dashboard tile to your dashboard page, click **Add Widget**.

Dashboards

Pending QA

Lists assessments that are ready for QA. Used by Clinical QA staff and Coders.

In the Clinical app, QA docs come back to the clinician for review/edits in the To-Do List under QA Review Complete category

Category	Patient Name	Document Type	Days Old
Charting In Progress	Sam Goalie	Skilled Visit Note	188 Days Old
	Sam Goalie	Drug Regimen Review	188 Days Old
	Baby Bear	Recertification	439 Days Old
	Baby Bear	Skilled Visit Note	545 Days Old
	Penny Americare	Discharge	559 Days Old
	Penny Americare	Skilled Visit Note	559 Days Old
Unsigned Orders	Jessica Brickers	Supplemental	49 Days Old
	Mike Johnson	Plan of Care	60 Days Old
	Felicia Sharp	Supplemental	62 Days Old
	QA Review Complete		

Reports

QA Requests Changes report

Lists all items that currently have changes requested by QA. The report can be run by agency or branch. All columns are sortable. This report is useful for agency directors and management who want to monitor QA review timeliness.

Days in QA	Days From SOC	Days Pending Fil	Patient	Document Name	Author	Visit Date	Create Date	Signed Date	Clinical QA Revi	QA Review Date	Coder QA Review	QA Review Date	der)

Assessment QA Process

- User (Author) signs an Assessment Requiring QA.
 - Displays in the charting tab with status of **Pending QA Review**.

Document	Status
Start of Care	Pending QA Review

- Assessment appears on the **Pending QA Review** dashboard.

2. Clinical/Coder QA reviews assessment

- Clinical QA** reviews the assessment and provides feedback at each question level. Clinician is responsible to make edits via the clinical app.
- Coder QA** reviews the assessment, updates the diagnosis list on the assessment, and provides feedback on the assessment.
- Select the **QA Complete – Changes Required**.

- d. Charting tab is updated with status of **QA Requests Changes**.

- e. If no changes are required, then select QA Complete – No Changes Required. The assessment is processed (the Plan of Care and OASIS file are generated, and the chart is updated with any changes (orders, care plan, meds)).
Note: Both the Clinical and Coder QA need to approve an assessment before it is considered complete.

3. User (Author) Updates Assessment

- a. Author updates/edits the assessment with the changes indicated in the feedback section of each question.
- b. Assessment is signed
- c. **Return to Step 2**

Appendix- QA Setup

Setting up Security Roles/Users

QA Review Workflow Roles/Users

Role	Function
QA Review Clinical	Identified user who is reviewing the assessment for clinical answers/documentation
QA Review Coder	Identified user who is reviewing the assessment for appropriate diagnosis coding
Administrator and Assessment Administrators	<p>These users have the ability to complete the QA Review</p> <ul style="list-style-type: none"> ▪ If a person with the admin roles does QA first, it will be considered the QA Reviewer – Clinical person ▪ If a person with the admin roles does QA after the first review is done, it will be considered the QA Reviewer – Coder person

Assign Security Roles to Users

1. From Web portal, select **Setup**.
2. Select **Security Users**.
3. Find user to add the desired roles and select **Edit**.
4. From **Roles Assigned**, select the roles to add.
5. Select **Save**.
6. Repeat for all users who require the QA Review roles.

QA Review Document Template Setup

Agencies must determine which document types require QA Review and set up the roles that should QA review them.

Procedure

1. Select **Administration > Templates**.
2. Find document template that requires QA Review.
3. Select **Settings**.

Document Templates Show Inactive

	↕ Title	Type	↕ Start Date	↕ End Date	↕ Description	↕ Enabled
Settings	Start of Care	PDF	08/17/2020		Start of Care	✓
Settings	Start of Care (Comprehensive)	PDF	06/03/2021		Start of Care (Comprehensive)	✓
Settings	Physical Therapy Start of Care	PDF	08/19/2021		Physical Therapy Start of Care	✓
Settings	Occupational Therapy Start Of Care	PDF	09/22/2021		Occupational Therapy Start Of Care	✓
Settings	Speech Therapy Start Of Care	PDF	11/03/2021		Speech Therapy Start Of Care	✓

4. Select **QA Review**.
5. Both Clinical and Coder will be selected. If only one review is needed, deselect the role not required.

Template Settings

Enabled
Enables the document to be available for use in charting.

QA Workflow
Indicates QA Workflow is enabled for the document.
At least one QA type must be enabled for the QA Workflow to be enabled.

Clinical QA
Indicates Clinical QA is required prior to final signature.

Coder QA
Indicates Coder QA is required prior to final signature.

Cosigning Workflow
Indicates cosigning of the document is required.

6. Click **Save**.

Tip: If your agency has only one person doing the Clinical and Coder review, we recommend you select only QA Review – Clinical.

QA Dashboard Setup

- For **QA Pending Review** dashboard, select **QA Reviewer Clinical** and/or **QA Reviewer Coder** role(s).

To set roles for dashboards:

1. Select **Administration > Dashboards**.
2. Find dashboard to edit.
3. Select **Edit**.
4. Select **Roles** that need to have access to the dashboard.
5. Select **Accept**.
